

The MPG logo is displayed in a stylized, bold blue font. The letters are contained within a rounded rectangular box with a blue-to-white gradient and a blue border. The background of the entire image is a faded, high-angle photograph of an industrial facility with several large buildings and solar panels on the roofs.

MPG

SHAPING PACKAGING SINCE 1976

Solidity, Reliability, and Technical Expertise

For over 50 years, MPG has been an established industrial partner in the production of rigid plastic packaging for the food industry, with a steadily growing presence in the pharmaceutical and home care sectors.

Since 1976, we have supported our customers across Italy and Europe from concept to finished product, providing turnkey solutions, co-design expertise, and continuous innovation focused on quality and sustainability.

Driving the Packaging Transition: From Vision to Industrial Scale

In over 50 years of history, we have learned that innovation only delivers real value when scaled up to industrial production.

Value for Our Stakeholders

Compliance & Co-Design

Strategic partner for PPWR compliance, joint design, rapid prototyping, and scalable manufacturing capacity for small, medium, and multinational brands.

Cribis Prime & Minibond

Financial transparency, top-tier credit rating, and robust corporate governance.

50-Year Legacy

Industrial stability, consistent high-volume production, and operational continuity.

History & Track Record

Awards

Award-winning lids at Oscar dell'Imballaggio

Plasmon milk lid

Plasmon aseptic lid

1976

Foundation of **MPG Manifattura Plastica S.p.A.**

2009

Oscar dell'Imballaggio Award "Quality Design"
for the Plasmon milk lid.

2012

Oscar dell'Imballaggio Award "Quality Design"
for the Plasmon aseptic lid.

2013

Joined **Sedex** (Supplier Ethical Data Exchange), a non-profit organization dedicated to driving ethical and responsible business practices in global supply chains.

2015

Awarded the EU "**Seal of Excellence**" under the Horizon 2020 Research and Innovation Programme.

2017 - 2021

Awarded "**Cribis Prime Company**" status for commercial reliability, financial soundness, solvency, and payment punctuality.

2020

First rigid plastic packaging manufacturer in Italy to receive **ISCC PLUS** certification for using bio-based PP.

2015 - 2021

Issuance and placement of **Minibonds** on the Italian Stock Exchange (Borsa Italiana).

International Markets

35% of our production is exported, with an established market footprint across Europe.

We serve major international brands with reliability, punctual deliveries, and tailored co-design solutions.

Production Capacity

High-output production lines, reliable capacity, and custom solutions engineered for large-scale enterprise customers.

From prototyping to full-scale mass production: MPG is the ideal partner for every stage of the project lifecycle.

Sectors

Technologies

INJECTION MOLDING

An ideal technology for producing **containers with complex geometries**, variable wall thickness, and flawless surface finishes—perfect for food, cosmetics, and pharmaceutical applications.

THERMOFORMING

An **efficient** and **versatile** process for manufacturing lightweight yet durable rigid plastic containers, highly suited for food packaging.

Core Competencies

CO-DESIGN & ENGINEERING

Joint product engineering: from initial **concept** and **prototyping** to **turnkey solutions**, backed by full technical support.

R&D & INNOVATION

Advanced technical expertise and applied **research** dedicated to the **continuous optimization** of materials, manufacturing processes, and product performance.

Certifications as a Process Guarantee

Certifications are more than a compliance requirement; they are a concrete framework ensuring quality control, end-to-end traceability, and operational reliability.

They are embedded in our daily operations, allowing us to consistently supply safe, high-performing, and fully compliant solutions.

Sustainability You Can See, Measure, and Certify

MPG has long championed the fundamental right to food access, actively contributing to technological advancements in food preservation packaging.

A principle supported by reducing energy waste, adopting renewable power, producing recyclable and eco-friendly packaging, and investing directly in sustainable development goals.

ISCC PLUS Pioneers

1st manufacturer in Italy certified
for bio-based rigid food packaging.

Decarbonization

Reductions of up to -2.5 kg CO₂
per kg of processed
polypropylene

PPWR Compliance

Design for Recycling (DfR)
engineering.

Green Energy in Every Product

100% powered by certified
renewable energy sources.

Case History

Coppa del Nonno Goes "Bio" with MPG Packaging

MPG produced the iconic Coppa del Nonno gelato cup using ISCC PLUS certified renewable-source Polypropylene (PP).

Millions of cups manufactured over 4 years, successfully introducing eco-sustainable packaging to the market while significantly reducing fossil fuel consumption.

Our Customers, Our Pride

We partner with leading international food industry brands.

We take pride in serving as the technical and manufacturing partner for companies that share our commitment to quality, innovation, and sustainability.

Behind every packaging unit lies a collaborative journey built on trust, active listening, and shared objectives.

Beyond Industry: Values, Sports, and Community

Fostering synergies, supporting talent, and cultivating a community-oriented corporate culture.

For MPG, Corporate Social Responsibility (CSR) means investing in our people and local communities.

For many years, we have sponsored Igor Volley Novara, supporting the team through a journey of personal and athletic growth crowned by major triumphs in the Italian Cup and CEV Champions League.

Uniting people and businesses around a shared passion is a rare value. Shared intent is the only true pathway to growth—in sports as in business.

Coppa del Nonno: MPG Gallarate Manufactures the Bio-Plastic Cups

MPG produces the eco-friendly cups for Nestlé's iconic Coppa del Nonno ice cream using ISCC PLUS certified bio-based polypropylene, achieving a production milestone of 100 million pieces over four years while significantly reducing fossil fuel consumption.

How an ice cream tub is born

A behind-the-scenes look at MPG's production plant in Gallarate (Varese), where rigid food packaging is manufactured for global household brands including Nestlé, Valsoia, Igor Gorgonzola, and Granarolo.

MPG passa all'elettricità verde

Il produttore varesino di imballaggi per alimenti utilizza dal mese scorso energia proveniente esclusivamente da fonti rinnovabili.

2 settembre 2024 08:40

Il fornitore di imballaggi in plastica rigida per alimenti **MPG Manifattura Plastica** ha annunciato che dal mese di agosto utilizza in produzione **energia elettrica** proveniente esclusivamente da **fonti rinnovabili**, parte della politica di sostenibilità ambientale e di rispetto delle norme a protezione della natura e di riduzione dei gas climalteranti (CO2).

"Siamo convinti - spiega la società varesina - che questo risultato rappresenti un ulteriore passo significativo verso un **futuro più sostenibile**. Crediamo che anche la nostra clientela possa trarre beneficio da questa scelta in quanto potrà **comunicare** ai consumatori dei suoi prodotti che gli **imballaggi** utilizzati sono stati realizzati nel massimo rispetto dell'ambiente e della natura".

Fondata nel 1976 come piccola azienda di termoformatura, MPG Manifattura Plastica occupa un centinaio di addetti nello stabilimento di **Gallarate (VA)**, dove - su una superficie di oltre **20mila metri quadrati** - sono installate linee di estrusione, termoformatura e stampaggio ad iniezione con etichettatura nello stampo (IML). Nel 2023 ha registrato ricavi netti intorno a **18 milioni di euro**.

MPG Switches to 100% Green Electricity

As part of its environmental sustainability roadmap, MPG powers its Gallarate manufacturing facility—equipped with extrusion, thermoforming, and In-Mold Labeling (IML) injection molding lines—using 100% certified renewable energy to help clients lower their carbon footprint.
